

MDOT ENHANCEMENT/BEAUTIFICATION PROJECTS

Brandon, Mississippi

Estimated Cost: \$632,000

Federal/State Funds: \$632,000

Guest Consultants Inc. has been retained over the past few years by the City of Brandon to help coordinate, manage and design two MDOT Enhancement/Beautification projects. These projects are Mississippi Department of Transportation Local Public Agency projects which have to follow their Project Development Manual. Guest Consultants has assisted the City with following these procedures all of the way from the initial Project Activation Request into the Plan Development and Review phases and finally to the project completion phase. These projects have consisted of landscaping, irrigation, city sign placement, and the construction of curb & gutter, sidewalks, bollards and lighting. The current project that is underway includes the construction of five new “Welcome” signs.
