

## PINELAKE CHURCH Brandon, Mississippi

Pinelake Church voted to relocate their campus from Spillway Road to a 170 Acre Site on Highway 25 in Rankin County. This site involved construction of a new campus including a 2300 seat sanctuary, a gym/multi purpose facility and the site work associated with this new campus. Guest Consultants, Inc. was involved with the design team and charged with designing the civil site work package. The project consisted of parking to accommodate the sanctuary, drive access from Highway 25 and Marshall Road, a ring road to facilitate the large number of vehicles to the various parking areas, drainage design and detention for the entire development.

The entrance from Highway 25 required the construction of acceleration and deceleration lanes be constructed on Highway 25. This street access also required the design of a box culvert to cross a major drainage basin that crossed the north portion of their site. The drive from Marshall Road connected to the Ring Road and provided access to the Church as well as the School that was constructed as a separate contract. A later project added access to the campus from Highway 471 north of the Vine Drive and Highway 471 intersection.
