

## PUBLIC WATER SYSTEM IMPROVEMENTS

### Town of Puckett

Estimated Cost: \$103,773

Federal/State Funds: \$86,968

Over a period of three years, Guest Consultants, Inc. assisted the Town of Puckett in receiving three separate CDBG grants for existing water system improvements. In 2004 Guest Consultants, Inc. was contracted to produce plans and specifications for a water well rehabilitation project. This project included a pump replacement, installation of chlorination equipment, piping, and related appurtenances. The

Town of Puckett contracted Guest Consultants again to complete funding applications, plans, construction inspection and contract administration for a project that included water system improvements related to an aging water distribution system. This project consisted of the construction of 2733 LF of 4" water main, connections to the existing water system and

reconnections of existing water services. This CDBG project was completed in 2006. In 2007 Guest Consultants Inc. was contracted by The Town of Puckett to complete applications, plans and specifications to obtain emergency funding. The emergency funding was for replacement of a section of AC pipe that was very critical to the water system and the town. This project included 1200 LF water main, ties to the existing water system and the reconnection of existing water services. This CDBG funding was obtained through the CDBG Emergency Public Facilities Program and was completed in 2007.
